

PRIVATE TRANSPARENCY REPORT

2024

One Rock Capital Partners, LLC

Generated 25-11-2024

About this report

PRI reporting is the largest global reporting project on responsible investment. It was developed with investors, for investors. PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The private Transparency Reports, which are produced using signatories' reported information, support signatories to have internal discussions about their practices. Signatories can also choose to make these available to clients, beneficiaries, and other stakeholders.

This private Transparency Report is an export of your responses to the PRI Reporting Framework during the 2024 reporting period. It includes all responses (public and private) to core and plus indicators.

In response to signatory feedback, the PRI has not summarised your responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options that you selected are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

Disclaimers

Legal Context

PRI recognises that the laws and regulations to which signatories are subject differ by jurisdiction. We do not seek or require any signatory to take an action that is not in compliance with applicable laws. All signatory responses should therefore be understood to be subject to and informed by the legal and regulatory context in which the signatory operates.

Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

Data accuracy

This document presents information reported directly by signatories in the 2024 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented.

The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

One Rock Capital Partners, LLC ("One Rock") is a private equity firm that provides investment advisory services to private funds. One Rock's approach to ESG in its business operations and investment process on behalf of its funds is an evolving one. The firm believes that the review and consideration of ESG factors may (in some cases) ultimately enhance its investment process, subject to the firm's overall fiduciary duty to act in the best interest of its clients.

As part of One Rock's investment process, which generally targets businesses that require strategic and operational expertise, the firm may consider businesses with persuasive ESG propositions linked to value creation. ESG considerations may help to identify opportunities to facilitate top-line growth, reduce costs, and ultimately enhance valuations.

One Rock believes that climate change, in particular, has the potential to pose a threat to supply chains, communities and ecosystems, and can be a driver of investment risk and opportunity as global efforts continue to transition to a lower-carbon economy. The firm seeks to integrate climate-related risks and opportunities into its investment process in line with the recommendations of the Task Force on Climate-related Financial Disclosures ("TCFD").

Additionally, One Rock acknowledges the importance of social and governance issues including human rights, labor relations, diversity, equity and inclusion, and supply chain management. These factors are considered throughout the investment lifecycle to the extent they may help mitigate risks and drive value for portfolio companies.

The firm continues to review and consider a range of industry ESG standards including (but not limited to) the UN Principles for Responsible Investment ("UNPRI"), the Institutional Limited Partners Association ESG Assessment Framework ("ILPA") and the TCFD.

Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
 - refinement of ESG analysis and incorporation
 - stewardship activities with investees and/or with policymakers
 - collaborative engagements
 - attainment of responsible investment certifications and/or awards

During the reporting year, One Rock made progress on the following issues related to responsible investing, as detailed in our Annual ESG Report 2023-2024 (page 6).

1. Established ESG-aligned bonus targets for certain private fund portfolio companies
2. Calculated portfolio and firm GHG footprint
3. Published 2022-2023 ESG report and TCFD progress
4. Conducted first nature-related risk assessment for certain private fund portfolio companies (see 2022-2023 ESG report)
5. Received three ESG awards from PE Wire
6. Codified our firm values
7. Joined CDP's DiFrAG Advisory Group, Ceres' Private Equity Working Group, and Level20
8. Supported 10 of 14 portfolio companies to validate or commit to setting science-based emissions reduction targets
9. Launched pay equity analysis across certain private fund portfolio companies
10. Published 2023-2024 ESG report with expanded TCFD content

Section 3. Next steps

- What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

We will continue to leverage ESG as an element of our portfolio monitoring efforts, as we seek to further enhance value at our portfolio companies. This includes ESG initiatives focused on environmental regulation, industrial decarbonization, labor practices, supply chain transparency, and human rights – areas that can have a material impact on our portfolio and that respond to evolving investor priorities and disclosure requirements. We will also continue to align a portion of executives' variable compensation at many of our portfolio companies to the achievement of certain defined ESG targets.

Section 4. Endorsement

'The Senior Leadership Statement has been prepared and/or reviewed by the undersigned and reflects our organisation-wide commitment and approach to responsible investment'.

Name

Scott Spielvogel

Position

Managing Partner

Organisation's Name

One Rock Capital Partners, LLC

● A

'This endorsement applies only to the Senior Leadership Statement and should not be considered an endorsement of the information reported by the above-mentioned organisation in the various modules of the Reporting Framework. The Senior Leadership Statement serves as a general overview of the above-mentioned organisation's responsible investment approach. The Senior Leadership Statement does not constitute advice and should not be relied upon as such. Further, it is not a substitute for the skill, judgement and experience of any third parties, their management, employees, advisors and/or clients when making investment and other business decisions'.

POLICY, GOVERNANCE AND STRATEGY (PGS)

POLICY

RESPONSIBLE INVESTMENT POLICY ELEMENTS

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 1	CORE	OO 8, OO 9	Multiple indicators	PUBLIC	Responsible investment policy elements	1, 2

Which elements are covered in your formal responsible investment policy(ies)?

- ☒ (A) Overall approach to responsible investment
- ☒ (B) Guidelines on environmental factors
- ☒ (C) Guidelines on social factors
- ☐ (D) Guidelines on governance factors
- ☒ (E) Guidelines on sustainability outcomes
- ☒ (F) Guidelines tailored to the specific asset class(es) we hold
- ☒ (G) Guidelines on exclusions
- ☐ (H) Guidelines on managing conflicts of interest related to responsible investment
- ☒ (I) Stewardship: Guidelines on engagement with investees
- ☐ (J) Stewardship: Guidelines on overall political engagement
- ☒ (K) Stewardship: Guidelines on engagement with other key stakeholders
- ☐ (M) Other responsible investment elements not listed here
 - (N) Our organisation does not have a formal responsible investment policy and/or our policy(ies) do not cover any responsible investment elements

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 2	CORE	PGS 1	Multiple, see guidance	PUBLIC	Responsible investment policy elements	1

Does your formal responsible investment policy(ies) include specific guidelines on systematic sustainability issues?

- ☒ (A) Specific guidelines on climate change (may be part of guidelines on environmental factors)
- ☒ (B) Specific guidelines on human rights (may be part of guidelines on social factors)
- ☒ (C) Specific guidelines on other systematic sustainability issues

Specify:

One Rock acknowledges that all investment activities can be connected to intended and unintended sustainability outcomes, whether positive or negative – for example, greenhouse gas emissions, nature-related outcomes, or actual and potential human rights outcomes for people. The firm recognizes the need to minimize, and where needed mitigate, the (potential) adverse impacts that investments may have on material ESG factors. The approach may include:

- (1) Identifying and monitoring the principal adverse impacts (PAIs) on sustainability factors of all investments made by the One Rock funds, where relevant, applicable and where data is available.
- (2) Actively engaging with portfolio companies to support their materiality assessment (single or double) and disclosure of sustainability-related risks and opportunities and alignment with the UN Sustainable Development Goals (SDGs), where relevant and applicable.

- (D) Our formal responsible investment policy(ies) does not include guidelines on systematic sustainability issues

CLIMATE CHANGE

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 41	CORE	N/A	PGS 41.1	PUBLIC	Climate change	General

Has your organisation identified climate-related risks and opportunities affecting your investments?

☒ (A) Yes, within our standard planning horizon

Specify the risks and opportunities identified and your relevant standard planning horizon:

This year, the majority of One Rock's portfolio companies disclosed their climate-related risks and opportunities over all timeframes under a business-as-usual scenario as part of the CDP disclosure process. This assessment was facilitated by One Rock's Climate Risk Working Group and will evolve to include different climate scenarios in the future. Climate-related risks and opportunities identified within a standard planning horizon (defined as the average holding period for a portfolio company) may include current regulation, market and technology risk, and acute physical risk, as well as opportunities from new products and services and energy efficiency.

☒ (B) Yes, beyond our standard planning horizon

Specify the risks and opportunities identified and your relevant standard planning horizon:

This year, the majority of One Rock's portfolio companies disclosed their climate-related risks and opportunities over all timeframes under a business-as-usual scenario as part of the CDP disclosure process. This assessment was facilitated by One Rock's Climate Risk Working Group and will evolve to include different climate scenarios in the future. Climate-related risks and opportunities identified within a standard planning horizon (defined as longer-term beyond 2030) may include current and emerging regulation, market and technology risk, and acute and chronic physical risk, as well as opportunities from new products and services, energy efficiency, and new technologies.

- ☐ (C) No, we have not identified climate-related risks and/or opportunities affecting our investments

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 41.1	CORE	PGS 41	N/A	PUBLIC	Climate change	General

Does your organisation integrate climate-related risks and opportunities affecting your investments in its overall investment strategy, financial planning and (if relevant) products?

● **(A) Yes, our overall investment strategy, financial planning and (if relevant) products integrate climate-related risks and opportunities**

Describe how climate-related risks and opportunities have affected or are expected to affect your investment strategy, financial planning and (if relevant) products:

One Rock continues to develop and refine its climate strategy by building on market trend insights informed by the firm's understanding of emerging regulatory drivers and sectoral decarbonization trends. One Rock's climate strategy is centered on two broad pillars: (1) As a factor of the investment process, consideration of whether a potential investment can offer products and services with the potential to enable the low-carbon transition; and (2) Working with portfolio companies in an effort to decarbonize and build resilience to climate-related issues.

For example, investing in companies that produce and distribute everyday products and, where appropriate, helping them decarbonize or achieve other sustainability goals, has the potential to be far more impactful than investing solely in sectors that have achieved low-carbon goals early and easily. As such, we are increasing our level of engagement with portfolio companies to help them understand and potentially mitigate climate-related risks, as well as explore potential decarbonization strategies applicable to Real Economy sectors, such as:

- Energy efficiency: adapting production equipment to lower energy use per produced volume.
- Industrial electrification: replacing fossil fuel for heating with renewable electricity.
- Low-carbon fuels, feedstocks, and energy sources: replacing feedstock or fuel with non-fossil alternatives, e.g., hydrogen or sustainably produced bio-based feedstocks.
- Resource efficiency: lowering the demand for primary resources by increasing circularity (reuse, recycling, or replacement).

- (B) No, our organisation has not yet integrated climate-related risks and opportunities into its investment strategy, financial planning and (if relevant) products

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 43	CORE	N/A	N/A	PUBLIC	Climate change	General

Has your organisation assessed the resilience of its investment strategy in different climate scenarios, including one in which the average temperature rise is held to below 2 degrees Celsius (preferably to 1.5 degrees Celsius) above pre-industrial levels?

- ☒ **(A) Yes, using the Inevitable Policy Response Forecast Policy Scenario (FPS) or Required Policy Scenario (RPS)**
- ☐ (B) Yes, using the One Earth Climate Model scenario
- ☐ (C) Yes, using the International Energy Agency (IEA) Net Zero scenario
- ☐ (D) Yes, using other scenarios
- (E) No, we have not assessed the resilience of our investment strategy in different climate scenarios, including one that holds temperature rise to below 2 degrees

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 44	CORE	N/A	N/A	PUBLIC	Climate change	General

Does your organisation have a process to identify, assess, and manage the climate-related risks (potentially) affecting your investments?

☒ **(A) Yes, we have a process to identify and assess climate-related risks**

(1) Describe your process

Climate considerations are integrated into our investment process, from due diligence to portfolio management. We assess the climate risks and opportunities associated with each new potential investment and develop strategies to mitigate risks and capitalize on opportunities. Material ESG risks and opportunities, including around climate change (physical and transition risk), are reported to, considered, and documented by the ultimate decision-making body (e.g., Investment Committee) for every new potential investment.

(2) Describe how this process is integrated into your overall risk management

To ensure consistent application of this in the investment process, One Rock's ESG diligence toolkit includes a climate change screening, and the Investment Committee memo template includes climate-related risks and opportunities identified during the ESG pre-investment process.

☒ **(B) Yes, we have a process to manage climate-related risks**

(1) Describe your process

As an integral part of our climate risk management strategy, we remain committed to supporting our portfolio companies in their pursuit of ESG value creation initiatives aligned with decarbonization. During ownership, we actively engage with our portfolio companies to help them measure and reduce their greenhouse gas emissions and manage other climate-related risks and opportunities.

At the portfolio company level, One Rock places a strong emphasis on fostering governance structures that actively address climate-related risks. As of September 2023, two-thirds of portfolio companies have taken proactive steps to strengthen their climate governance, for example through board-level training on climate risk management, climate-related goals integrated into executive compensation, and annual CDP disclosure. In May 2023, we launched a Climate Risk Working Group focused on supporting certain portfolio companies in developing the structures and processes for climate risk management. The Working Group comprised eight portfolio companies and met weekly over a three-month period to review and share best practices related to climate risk management and carbon disclosure.

(2) Describe how this process is integrated into your overall risk management

At the portfolio level, deal teams partner with the ESG team to ensure that climate-related risks and opportunities are appropriately managed throughout the investment process. One Rock's ESG team is responsible for developing and implementing our climate strategy, reporting to the firm's Managing Partners to ensure high-level accountability for climate matters.

- (C) No, we do not have any processes to identify, assess, or manage the climate-related risks affecting our investments
